It has a lot of potential but a long way to go. Mechanically the game is sound but there is a plethora of small bugs that I'm sure will be resolved before the game is released.

Note: Opening sequence was not laggy at all in game, not sure why screen capture had issues with it. I like to review my chess games with a chess engine.

I would have liked to review my go games with a go engine in the past.

Now I do!

This is the first available go engine for this task. And I love it, it is a new era.

(Cons: Publisher does not offer upgrade from previous versions. Bought it anyways, because this is my most valuable go tool. Thanks Remi Coulom!). Wonderful, challenging runner. My wife gave it a try and she's hooked too! Overall, a nice pick up and put down game that's well worth the price.. An amusing enough take on epic, well-worn sword-'n'-sorcery soundtracks.

A bit of fun, but not a great deal else. Certainly superior to several swift kicks to the teeth. What more do you want for a dollar and ninety-nine cents USD?

Verdict: 7/10.

Cheers!). Broken game. Does not proceed when I found all the items, stays on hidden object scene. Tried to quit to main menu and continue few times - item list disappeared and I was clicking blindly. When I found all the items 3-4 times game continued to next HO scene and same problems happened again. No point to mention outdated graphics etc.

The AI for the cubs is really annoying. They are constantly trying to wander away from the safe den and directly into danger. Plus the playing mechanics are really weird. Also, the graphics are dated. I mean, some of the symbols for eating and picking up the cubs make me think of pre N64 games. 2V10 would not recommend.. (Review counted as the Complete Sam and Max Series 1,2 and 3)

Really entertaining and funny point and click adventure game. Though I admit I am a bit dumb when it came to puzzles in this game...often ended up looking up guides >w> SHHHHH! In all honesty the puzzles (basically everything you do in the game) are all well thought out so there isn't any super unrealistic answer to a problem that hasn't been hinted slightly in the game....Like pixel searching or using items together in a way that makes no sense to solve a problem.

Get it if you love point and click adventure games because this is as good as it gets!! ^.^ As long as you don't mind 15 games appearing in your games library after only buying 3..... Pleasantly surprised by this game considering the reviews that I was reading.

As far as the actual game was concerned, it's not the worst simulator I've played, but definitely not the best.

For first, the thing that I didn't like and slightly annoyed me was the fade to black, mission title, fade to game whenever I reached an area where it had to load something, once or twice sure, but it was getting really repetitive.

Besides that I can't really fault this game

7V10. Goog game. I got drunk.. I really like this game. I am a fan of card & board games, yet am tiring of the ccg card games. I'm finding this to be a wonderfully refreshing card game.

At first I thought it to be complicated, but it is actually a very approachable pick up and play game. I like the varying difficult modes in solitaire play as it really helps you to learn the game and incrementally increase the challenge.

At this time, there doesn't seem to be too many players playing the game, which I hope changes because playing with others really changes the dynamic, strategy and fun factor. I could see very fun tournaments and leaderboards some day.

If you are a fan of card games and board games, pick this up. It's a high quality fun game at a great price point. No pay to play here. For one price, you get the entire game.

Really enjoying it. Expecting a Summer Sale - Paradox Interactive increased base prices for most if not all their games.

Anything morally and ethically wrong with it?
