### About This Game

Wasteland Rampage is a visceral, **hardcore Roguelite**.

**Play online** with your friends or strangers.

### Key Features:

- As you delve deeper into The Source, you'll find new **special attacks** to augment your moveset. Will you keep your *Netherlauncher* to quickly juggle foes? Or equip a *Hyper Grenade Throw* for the pure explosive carnage?
- You'll also equip **unique items** all with special effects. Buy the items that supplement your play-style, and combine them for devastating synergies.
- Play long enough, and you'll learn **advanced techniques** to swing the fight in your favor. Perfect-Cancel to speed up your attacks, Dash-Guard out of harm's way, and aim your attacks precisely to change attack properties and deal more damage.
- A **variable difficulty meter** makes sure you're playing to your limit at all times. If you can avoid getting hit, you'll multiply the souls earned for dispatching foes. Of course, enemies will also become more numerous, and aggressive.

Actually feels alot better than it looks. Yea it looks like a flash game but damn once you unlock rampage character you're a living bayblade. While its good alone i would recommend bringing a friend for the experience As it tends to make it a hell of alot better when you know you can trust a fellow knight in this disgusting filth we call the wasteland.. Me and my buddy went into this thinking it was gonna be a waste of ten bucks, and let me tell you... It was not. Yeah, this looks like something you'd find on a flash site, but the animations for the attacks are pretty solid, and they flow well, imo. I also like how all attacks can combo into one another. We had a lot of fun with this in just the short two hours we played. Can't wait to see what else gets added.

P.S. Rampage is best class!. Pretty fun, need to play more before I make a legit review, but the game needs to be updated more before I play it more. :P. fun fun fun fun fun fun fun fun fun fun someone play with me and laugh at me as i die xd
